

List of reported UFO sightings

This is a list of notable reported sightings of unidentified flying objects (UFOs) some of which include related claims of close encounters of the second or third kind or alien abduction. UFOs are generally considered to include any perceived aerial phenomenon that cannot be immediately identified or explained. Upon investigation, most UFOs are identified as known objects or atmospheric phenomena, while a small number remain unexplained.^{[2][3][4]} UFOs have been referred to using a range of terms including the more specific "flying saucer" and the more general term "unidentified anomalous phenomena" (UAP). "UAP" is sometimes used to avoid cultural associations with UFO conspiracy theories.^{[5][6][7]}

Although often viewed as abnormal, UFO sightings are reported frequently.^{[8][9]} During the United States' initial 1947 wave, over 800 sightings were reported in the news.^[10] The British Ministry of Defence receives hundreds of reports each year.^[11] In Brazil, pilots alone report dozens of annual sightings.^{[12][13]} A small portion of reported sightings have lasting cultural significance,^[14] interpreted through the cultural and technological expectations of the time.^[15]

c. 1450 BC	<u>Tulli Papyrus</u> (de Rachewiltz 1953 ^[16])	<u>Ancient Egypt</u> ; <u>Jebel Barkal</u> , <u>Lower Egypt</u>	After a military campaign in Nubia, Thutmose III had a stele erected at the Temple of Amun, beneath the Jebel Barkal outcropping. ^[17] The stele describes how "a star came down" to set fire to Thutmose's adversaries. ^{[18][19]} This has been cited by Dr Condon ^[20] (Condon Committee ^[21]) via the purported Tulli Papyrus, likely a fraud. ^[20] This alleged translation—published in issue 41 of the Fortean Society's magazine <i>Doubt</i> —used such Fortean tropes as "circles of fire" and fish that "fell down from the sky". ^{[22]:369–372} The exact details of the papyrus is thought impossible to confirm due to transcription errors. ^[23]

76 BC	<u>Spark from a falling star</u>	<u>Roman Republic</u> ; <u>Asia</u>	According to Pliny the Elder, a spark fell from a star and grew as it descended until it appeared to be the size of the Moon. Plutarch reports the shape of the object as like a wine-jar (pithos). ^{[28][25]}
